## DESCRIZIONE

**BIO MICROZYME** is a concentrated water blend of aerobic and anaerobic bacterias, selected to produce activated enzymes for the organic deposits digestion in sewage tanks.

**BIO MICROZYME** if used continuously, create the bacterial flora necessary for the digestion of organic deposits with more efficiency and quickly.

## APPLICATIONS

**BIO MICROZYME** can be dosed through each toilet, lavatory or directly in sewage tanks.

**BIO MICROZYME** can be used to keep cleaned and in efficiency sewage pipe lines, in substitution of acid / descaling / alkaline or ipo-chlorite based products, that had the inconvenience of create an hostile environment to enzymes able to eliminate organic residual (origin of deposits and bad smell).

## ADVANTAGES

- It eliminates organic deposits and oil/grease deposits.
- It eliminates bad smells
- It avoids to employ dangerous products (acids or caustic)
- It avoids the necessity to clean mechanically sanitation systems
- It prevents obstructions in pipe lines
- Completely safe, not flammable, not toxic, biodegradable
- This composition meets the criteria for not being harmful to the marine environment according to MARPOL Annex V (resolution MEPC.201(62)).

## INSTRUCTIONS

Starting dosage: directly in tanks 1 ltr of **BIO MICROZYME** for each 1000 ltr of capacity.

Time of activation from first dosage: 24-36 hours.  
Following dosages can be done daily 1 ltr for each 4000 ltr of capacity.

**BIO MICROZYME** if used to clean pipe lines must be dosed in each toilet or lavatory 75-100 ml daily.

**BIO MICROZYME** must be used at a pH range between 5.5 and 8.5 and a temperature between 10 and 44 °C. Sudden and extreme pH and temperature variations could compromise the efficiency of **BIO MICROZYME**.

## PACKAGING

Not returnable

- Plastic pails 25 ltr.
