DESCRIPTIONS

BIOCOMPACT is a biological formula of micro-organic substances and free enzymes designed for maintaining toilets and waste systems in optimum sanitary conditions.

ADVANTAGES

BIOCOMPACT acts efficiently in a natural way on organic substances that cause foul smells and deposits.

The active bacteria contained in **BIOCOMPACT** penetrate deeply into the organic deposits together with the free enzymes and continue their activity in the pipes and tanks downstream from the toilets.

BIOCOMPACT does not contain any toxic substances; it contributes to the proper environmental equilibrium of the substances washed down the drain. It is easy to apply and to dose.

If used regularly it ensures clean and odorless sanitary installations without using environmentally harmful products such as acids or alkali.

INSTRUCTIONS

Apply **BIOCOMPACT** preferably at night to avoid a quick discharge of the product from the system to be sanitized. Apply the product in several points to secure a complete treatment, in particular if there is a long pipe to treat, if the slant is low and if there are several siphons and/or grease traps.

SIPHONS OF TOILET ROOMS, SHOWERS AND BATH TUBS:

First week:

1 tablet every other day in each equipment

Maintenance:

1 tablet every 3 days in each equipment

TOILETS, GREASE TRAPS, SIPHONS OF TOILETS

Double the dosage indicated above for the siphons.

PRECAUTIONS

Store in cool and dry place at temperatures between 10 and 45°C.

Close containers tightly after use.

Do not use together with acids, alkali, bleach or disinfectants. Wash hands after manipulating the product (as a simple precaution).

Keep away from children.

PACKAGING

- Cartons of 50 tablets
