

# water testing and on board service

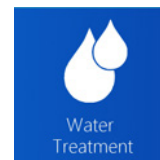

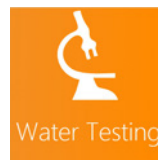

## BLUTEC SERVICES

**The importance of a professional partner in water treatments and analysis:**

Blutec technical staff offers to all clients a “free water testing service”: monthly boilers and cooling systems water analysis, performed in our Italian laboratory on water samples sent from our clients’ vessels all around the world.

Moreover, as a special additional service, it is available the “on board water testing service”: a Blutec technician will perform water tests directly on board your vessels, to assay the quality of the chemical treatment, giving advices, suggestions and providing complete reports to the company.
